Tempe, AZ (open to relocate) | +1 (623) 273-9954 | mihirkhl478@gmail.com

SUMMARY

Technical Data Analyst with 3+ years of experience and an M.S. in Business Analytics (GPA: 3.90). Experienced in building Power BI dashboards, developing DAX-based data models, and performing SQL/Python-driven analysis to support business and operational decision-making. Proven track record in data validation, reporting automation, and stakeholder-facing analytics across BFSI and enterprise environments.

EDUCATION

W.P Carey School of Business - Arizona State University	<i>M.S., Business Analytics</i>	GPA: 3.9	Dec 2025
Sanjivani College of Engineering, Maharashtra, India	<i>B.E., Computer Science</i>	CGPA: 7.89/10	May 2022

PROFESSIONAL EXPERIENCE

SDFC, Arizona State University | Membership Services Supervisor **Apr – Dec 2025**

- **Maintained and enhanced operational performance reports**, standardizing metrics across three teams and reducing reporting inefficiencies by **12%**.
- **Analyzed operational data and customer feedback** to identify trends and improvement opportunities, while maintaining documentation and ensuring accurate data inputs with on-site teams.

Humane Bits | Data Analyst

May – Jul 2024

- Supported the re-architecture of the "Secure Collect" platform using CQRS and Clean Architecture with .NET and REST APIs, improving system scalability and data usability for stakeholders.
- Designed and implemented Power BI dashboards using Power Query and DAX to analyze historical case data, transforming complex business logic into actionable visual insights for non-technical users.
- Ensured 100% data integrity during system migration by validating data flows between backend services and reporting layers, maintaining accurate end-to-end visibility.

Persistent Systems | Business Analyst

Feb 2022 – Feb 2024

- Worked in the **BFSI domain** supporting a large **healthcare insurance client**, analyzing policy and claims data to improve policy recommendations and default claim handling.
- Created **user stories and acceptance criteria** and partnered with engineering teams to build **QA automation frameworks** for validating insurance policies and claims logic.
- Designed and delivered **Power BI dashboards** using **Power Query and DAX**, building scalable data models to analyze customer profiles, policy performance, and claim behavior. Used **Lucidchart** to document data flows and business logic, improving alignment between technical teams and business stakeholders.
- Delivered **data-driven recommendations** to stakeholders on optimizing existing policies and identifying opportunities for **new insurance policy offerings** based on customer and claims insights.

Lanzay | Data Analyst

Feb 2021 – Feb 2022

- Applied data analysis to simplify the interior design and home renovation process by evaluating material cost variations and their impact on overall build and renovation pricing.
- Designed and maintained automated Power BI dashboards using Power Query and DAX, implementing scalable data models to analyze multi-source pricing data, reducing data retrieval time by 40% and improving sales and planning accuracy by 18%.
- Collaborated with Engineering and Product teams to implement data governance protocols, ensuring 100% data integrity across reporting pipelines and analytics outputs.

PROJECTS

Capstone Project – Market Research | Caliber Global

Aug – Oct 2025

- Built a competitive intelligence framework analyzing Caliber's positioning against key competitors using third-party market data, uncovering differentiators to guide strategic market positioning
- Created a Strategic Installation Playbook identifying expansion opportunities, operational synergies, and go-to-market actions that strengthened Caliber's value proposition for executive leadership

Capstone Project - ML Engineer | Grip Lab AI

Aug – Dec 2025

- Developed a predictive ML model trained on 200 days of multi-source biomechanical and wearable data, achieving 10-15% higher accuracy than standard recovery scores and establishing grip strength as a key physiological predictor.
- Analyzed relationships between grip strength and recovery metrics by analyzing a 200-day multi-source dataset (grip devices, Oura Ring, and Whoop), confirming grip strength as a new biomarker for daily recovery.

SKILLS AND CERTIFICATION

- Data Analytics & Querying : SQL (Advanced), Python, Pandas, Data Cleaning, Data Validation, Trend Analysis, Root-Cause Analysis
- Business Intelligence & Visualization : Power BI (DAX, Power Query, Row-Level Security), Tableau, Microsoft Excel (Advanced – Pivot Tables, Power Query, VBA), Dashboard Design, Executive Reporting, AWS (Foundational)
- Data Management & Engineering : ETL Pipelines, Data Modeling, Data Warehousing, Relational Databases (MySQL), REST APIs,
- Programming : Object-Oriented Programming (OOP), Python, C++, .NET (Foundational), Version Control (Git)
- Frontend & Web Technologies (Foundational) : HTML, CSS, JavaScript, React
- Process & Collaboration Tools : Lucidchart, JIRA, SPSS

Certification : Lean Six Sigma Green Belt – AIGPE, Deloitte – Data Analytics Certification
